

reflecting the other of the optical channels back through the switch
via the second arm; and

dropping said at least one of the optical channel from said first arm
of the second polarization splitter.

44. (New) The method of claim 43, wherein the dropping step comprises the
substep of:

passing the at least one of the optical channels to another acousto-
optical switch for addition to a different plurality of optical channels.

REMARKS

The claims have been amended to conform them to U.S. practice. Claims 23-44
are pending in this application. No new matter has been added.

The title has been amended to conform it to the title as amended by the
International Searching Authority. The International Searching Authority also amended
the Abstract as shown on the enclosed cover page of the printed publication of WO
00/39629.

If there is any fee due in connection with the filing of this Preliminary
Amendment, please charge the fee to our Deposit Account No. 06-0916.

Respectfully submitted,

FINNEGAN, HENDERSON, FARABOW,
GARRETT & DUNNER, L.L.P.
